

Project description

Strategies to Reduce CMV Involved Crashes, Fatalities and Injuries

Questions with *Answers in italics*

1. What is the status of the Work Zone Truck Safety project in which request for proposals were initiated?

It was decided by the MTSC that a comprehensive proposal aimed at the strategic plan (which work-zone truck crashes may be a part of) ensures both fiscal responsibility of MTSC funds and provides for an overall better end product with increased opportunities to improve CMV safety.

2. What is the budget for the new RFP?

There is no established budget for this project. A budget and subsequent details should be included in any proposal submission.

3. Why a 6 month time frame for new truck project?

This proposal would be a 1-year grant, with 9 months set aside for development. A 3 month 'buffer' exists to answer questions and issues brought up after the presentation of the final report.
